

Chauhan Chirag

Microsoft Certified .NET & Angular Developer

+91-8200155458 chirag.chauhan.dev@gmail.com Portfolio

Professional Summary

Software Developer with 3.8+ years of experience in building scalable enterprise applications using **.NET Core, Angular, and Microsoft Azure**. Microsoft Certified Azure Developer with strong expertise in logistics systems, IoT-based monitoring, secure transportation solutions, and real-time dashboards. Familiar with AI-powered IDEs like Cursor and Antigravity.

Technical Skills

Languages: C#, JavaScript

Frameworks: .NET Core, ASP.NET MVC, Web API

Web Technologies: Angular (9, 14, 17, 18), AngularJS

Cloud: Microsoft Azure

Databases: SQL Server, PostgreSQL, MongoDB

Tools: Git, Visual Studio, VS Code, Postman, MobaXterm, Cursor, Antigravity, clude

Coding Strengths

API Development | Microservices Architecture | Angular UI | .NET Core | Azure Cloud | Azure App Services | CI/CD Pipeline | AI-Integrated Development

Professional Experience

Software Developer

Aug 2022 – Present

Prompt Dairy Tech Pvt. Ltd., Ahmedabad

- Involved in end-to-end software development lifecycle including requirement analysis, development, testing, code review, and deployment.
- Developed scalable backend APIs and Angular based enterprise applications.
- Collaborated with cross functional teams to ensure timely delivery and system reliability.

Certifications & Awards

- Microsoft Azure Developer Associate (AZ-204)
- Microsoft Azure Fundamentals (AZ-900)
- Gold Award – MCA (2025)
- Above and Beyond the Call of Duty (ABCD)

Key Projects

AMUL AMCS – Automatic Milk Collection System

.NET MVC, AngularJS, SQL Server, PostgreSQL

- Automated milk collection operations by integrating hardware devices such as DPU for accurate measurement and data capture.
- **Roles & Responsibilities:**
 - Understanding sprint requirements and implementing assigned modules.
 - Writing and executing test cases to ensure quality deliverables.
 - Fixing bugs and improving system performance through iterative enhancements.

Prompt Route Planner

.NET Core 6 & 8, Angular 17

- Optimized milk collection routes for efficient logistics operations.
- **Roles & Responsibilities:**
 - Rapid understanding of tasks and implementation of backend and UI features.

- Integration of map services for route visualization.
- Implementation of Identity Server for authentication and authorization.
- Deployment of updates to test environments and refinement based on feedback.

Prompt Dairy Platform (Microservices Architecture)

.NET Core 3.1, Angular 9 & 18

- Microservices-based platform to manage multiple dairy operations.
- **Roles & Responsibilities:**
 - Developing and maintaining logistics management modules.
 - Creating new APIs and reusable Angular UI components.
 - Ensuring smooth integration between front-end and back-end services.
 - Coordinating data flow and API contracts to maintain consistency across microservices.

RMRD Dashboard

.NET Core 8, Angular 17

- Real time dashboard for daily milk collection analytics.
- **Roles & Responsibilities:**
 - Processing daily milk collection data and ensuring real-time updates.
 - Integrating dashboard with existing MVC application.
 - Adding analytical features to improve data visibility and usability.

Warehouse Monitoring & Alert Escalation System

.NET Core, Angular, IoT Devices

- Real time warehouse condition monitoring using IoT device data.
- **Roles & Responsibilities:**
 - Synchronizing temperature, door status, battery, and power supply data.
 - Implement alerts with automatic escalation.
 - Developing dashboards for device health and temperature trends.

Secure Lock System for Milk Transportation

.NET Core, Angular, GPS, Geofencing

- Developed a secure digital lock system to maintain milk quality and ensure safe transportation.
- **Roles & Responsibilities:**
 - Integrated biometric and hardware-based digital lock mechanisms for enhanced security.
 - Implemented live vehicle tracking using GPS with real-time monitoring capabilities.
 - Designed and implemented GPS tracking with geofencing-based lock control.
 - Developed alert mechanisms for overspeeding, route deviation, unauthorized stoppage, and lock tampering events.
 - Implemented security handling for failed lock attempts with automated alert notifications.
 - Built GPS offline detection logic to notify system administrators in case of connectivity loss.
 - Supported vehicle breakdown and operational failure workflows to ensure uninterrupted logistics operations.

Education

Master of Computer Applications (MCA)

Monark University (CGPA: 9.1)

2022 – 2024

Bachelor of Science in Information Technology (B.Sc. IT)

Saurashtra University (82.84%)

2019 – 2022

Declaration: I hereby declare that the above information is true to the best of my knowledge.
